

We manufacture grease filters according to your dimensions.

Frames are made of stainless steel.

It's possible to produce filters form zinc-plated metal, if they are used as a prefilters for coarse filtration.

Filter thickness is starting from 10mm.

Filtration's efficiency

**90% - 95%**

Initial pressure drop      **20 Pa**

Recommended final pressure drop      **250 Pa**

Maximum operating temperature
