

Bacteriologic filters for premises with raised demands for pure air.

For example: hospitals, operating rooms, pharmaceutical plants, laboratories, food production plants

Frame material: MDF, PVC compound, metal or aluminium (68mm frame only).

Standard frame thickness: 68mm, 78mm, 150mm, 292mm.

We also offer manufacture of filters with unstandartized thickness of frame.

Filter Classification			
Efficiency (%) at the MPPS		Penetration (%) at the MPPS	
Overall Value	Local Value	Overall Value	Local Value
E10	>	85	-
E11	>	95	-
E12	>	99,5	-
H13	>	99,95	99,75

H14	>	99,995	99,975
-----	---	--------	--------

0

U15	>	99,9995	99,9975
-----	---	---------	---------

0

Notes:

- Filters in the class E10, E11 and E12 do not require verification of local penetration.
